

spark-framework

SPARK site: the forms and their questions

For the Web Content team, district IT, and whoever builds each Microsoft Form. October 2026, v3.2. Where to embed each form, and how embed codes work, is in [HANDOFF.md](#) section 3.

The site uses four public forms, embedded on three pages. A fifth form, the Develop packet, is sent only by invitation and is not on the site.

Form	Embedded on	iframe title	About
Share an idea	Share an idea, under "Send your idea"	Share an idea form	5 minutes
Support an idea	What we're working on, under "Support an idea we're studying"	Support an idea form	2 minutes
Check your idea's status	Share an idea, under "Check your idea's status"	Check your idea's status form	2 questions (no time shown on the page)
Site feedback	How SPARK works, at the bottom	Site feedback form	1 minute

Settings for every form:

- "Anyone can respond."
- "One response per person" off.
- "Record name" off.
- Ask for email only as a question, next to the consent line. (The status check and site feedback forms have no consent line.)
- Turn on a custom thank-you message.

Spanish: duplicate each public form and translate it, keeping the same questions. Responses from the Spanish copy are marked Spanish, so replies go out in Spanish. Status emails go out in the idea's language (section 3).

If the forms open later (launch variant B, decision D1): until the forms are live, the pages show a dated note in place of each embed and its fallback link. The status check opens with the idea form. The wording is in [V3.2_SPEC.md](#) W10. With a single launch (variant A), the forms are embedded as in HANDOFF.md section 3.

1. Share an idea

The public page describes this form as “About 5 minutes.” It has 13 questions: 4 about the person and consent, and 9 about the idea. Question 10 has one follow-up.

#	Question	Type	Required	Limit or choices	Help text shown under the question
1	Your name	Text	Yes	100 characters	So we can reply to you. Never published.
2	Email	Text	Yes	150 characters	We reply here within 3 weeks.
3	I am a...	Choice	Yes	Parent or guardian; Student; SUSD teacher or staff; Principal or school leader; Community member; Other	
4	School connection	Text	No	100 characters	Which SUSD school is this about or connected to, if any?
5	Idea title	Text	Yes	80 characters	Ten words or fewer.
6	What is the idea?	Long text	Yes	1,000 characters	What would students do differently? Keep it plain.

#	Question	Type	Required	Limit or choices	Help text shown under the question
7	Level	Multiple answers	Yes	Elementary; Middle; High; All levels	
8	Theme	Choice	Yes	Arts; College and Career; Dual Language Immersion; Early College; Gifted and Advanced; International Baccalaureate; STEM; Traditional; Other	Pick the closest fit. Choose Other if none fits.
9	What kind of idea is this?	Choice	Yes	New school model or learning environment; New program within a school; Change to something SUSD already offers; Something else	"Something else" is fine; we'll point you to the right team.
10	Similar to anything already listed on the site?	Choice	Yes	No; Yes (Yes opens 10b)	
10b	Which one?	Text	No	200 characters	Name the study or program; your idea may be joined to it.
11	Why does SUSD need this, and who wants it?	Long text	Yes	1,000 characters	Who has asked for it? Anything you know about demand.

#	Question	Type	Required	Limit or choices	Help text shown under the question
12	Would you help?	Choice	Yes	Help develop it; Updates only; No thanks	
13	Consent	Choice	Yes	I understand	Your name and email are never published. Your idea may appear on sUSD.org/spark in summary form, without your name.

The “Other” theme (question 8): the eight program themes plus Other. Other also appears in the counts by theme and the “Already suggested” lines, but never on Our programs. The screener may move an idea from Other into a theme. If several ideas share a topic, the screener may flag a possible new theme. If an Other idea is selected for study, the SPARK team gives it a theme before it is published. It may name a new theme.

Thank-you message: “Thanks. Your idea ID and reply-by date are on the way to your email. If you chose ‘Something else,’ these channels may act faster: Let’s Talk, your school office, the school repurposing input page, or public comment at a Governing Board meeting.”

2. Support an idea

About 2 minutes. It is for the ideas the SPARK team is studying now.

#	Question	Type	Required	Limit or choices	Help text
1	Which idea?	Choice	Yes	The ideas listed on What we’re working on, by public title (no idea IDs; spec 8.1). Refreshed after each quarterly review. Today: Gifted and Advanced Studies Magnet School (K-8); Visual and	

#	Question	Type	Required	Limit or choices	Help text
				Performing Arts Magnet School (K-8)	
2	Your relationship	Choice	Yes	Parent or guardian at that school; Parent or guardian elsewhere in SUSD; Student; SUSD staff; Community member	
3	Anything to add?	Long text	No	600 characters (about 100 words)	One input the SPARK team reads at review; not a vote.
4	Email	Text	No	150 characters	Only if you want that idea's updates.
5	Consent	Choice	Yes	I understand	I understand notes are read by the SPARK team and summarized, never posted.

Thank-you message (proposed; not in the spec): "Thanks. Your note goes to the idea's design team before its next meeting. We summarize what we heard each quarter in You said, we did."

3. Check your idea's status

For people who already sent an idea. It sits on Share an idea, after "What happens next" (anchor `#status`). Step 1 of "What happens next" links to it. The text above the form reads: "Enter your idea's ID and the email you used. If they match, we email you the current status."

#	Question	Type	Required	Limit or choices	Help text
1	Idea ID	Text	Yes	To match the SPARK list's ID format	
2	Email	Text	Yes	150 characters (as in the other forms)	

Thank-you message: "Thanks. If the ID and email match an idea, the status is on its way to that email." It is the same every time, whether or not anything matched. The page never shows a status.

Spanish: a Spanish twin, with the same two questions. Status emails go out in the idea's language, as stored in the SPARK list.

Behind the form (from [V3.2_SPEC.md](#) section 8.3; the Web Content team decides the final method):

- **Recommended:** this form plus a Power Automate flow. It uses standard connectors included with Microsoft 365: Forms, SharePoint, and Office 365 Outlook.
- **District IT** confirms that Power Automate and the Forms setting "Anyone can respond" are on.
- **Matching:** the flow finds the idea by its ID. It sends an email only if the ID and the email both match the stored record, ignoring capital letters and spaces.
- **The email** goes only to the stored address. It gives the current public stage, the outcome reason, and the next step.
- **Limit:** at most one status email per idea per day.
- **Merged ideas:** the email gives the idea's own outcome, plus the other idea's public stage and next step. It quotes the other idea's title or reason only if that idea is already published.
- **Sender:** the SPARK shared mailbox, not a person's account. Check that outside-recipient rules allow mail from it.
- The idea ID is a reference number, not a password. There is no public list of IDs or statuses.

4. Site feedback (proposed; not in the spec, confirm with the Assistant Superintendent)

About 1 minute. How SPARK works ends with "Something unclear on this site? Tell us."

#	Question	Type	Required	Limit or choices	Help text
1	Which page?	Choice	No	SPARK home; What we're working on; Our programs; Share an idea; How SPARK works; The whole site	
2	What was unclear, or what	Long text	Yes	500 characters	

#	Question	Type	Required	Limit or choices	Help text
	would help?				
3	Email	Text	No	150 characters	Only if you want a reply.

Thank-you message (proposed): “Thanks. The SPARK team reads every note and uses it to improve this site.”

5. Develop packet (invitation only, not on the site)

The SPARK team sends this to an idea’s submitter, or to their school contact, after a SPARK team review asks for more detail. It takes 30 to 45 minutes. It asks for links rather than uploads, because people outside the district cannot attach files. Sections:

- Idea ID, name, email.
- **Strategic alignment:** which SPARK areas of focus; fit with the strategic plan; the student problem it solves.
- **Demand evidence:** who has asked, and how many; comparable schools or programs elsewhere, with links; enrollment or waitlist facts; expected draw from outside SUSD.
- **Instructional model:** structure (dedicated specialty school, schoolwide specialty program, or signature program within a school); what a week looks like; curriculum or certification; staffing.
- **Feasibility:** space and transport; earliest realistic start (2027-28, 2028-29, later); prerequisites and risks.
- **Cost:** start-up estimate; annual estimate; funding sources.
- **Partnerships:** organizations and commitments; permission to contact them.
- **Involvement:** your role; hours per month; others to invite.
- Consent.

Behind the forms (for whoever builds them): responses go to the SPARK list, a SharePoint list. The Web Content team builds the intake form, the SPARK list, and the SPARK team’s internal portal. Power Automate sends the confirmation email and the reply templates. A monthly summary, generated on the 1st from the SPARK list, feeds the site updates. [V3.2_SPEC.md](#) section 8 lists what the public site needs from the SPARK list. It covers the fields, the stage names, the status

check, the counts, and the privacy rules. The v3.1 detailed design spec proposed list columns, flows, and email templates.
